Warranty regulations and liability

Terms and Conditions

Customers shall contact SMA America to obtain a Return Merchandise Authorization (RMA) number before returning products. SMA America accepts no responsibility or liability for products returned without prior authorization. SMA America, at its sole determination, will repair or replace inverters returned by customers. Inverters must be returned with a copy of the original dealer invoice or written proof of installation. Inverters must include a legible label showing the serial number and type of the inverter.

The inverter must be returned to SMA America in the original packaging materials or packaging providing equal protection during shipment. SMA America is not responsible for damage occurring during shipment.

The customer has to grant SMA the necessary time and opportunity to rectify the fault.

Exclusion of Liability

SMA America disclaims any liability for direct or indirect damages due to:

- transportation damages,
- improper installation or commissioning,
- manipulation, alterations or repair attempts,
- inappropriate use or operation,
- insufficient ventilation of the device,
- non-compliance with relevant safety standards or regulations,
- force majeure (lightning, overvoltage, storm, fire).

We cannot guarantee proper functioning of data transmission via mains lead (Powerline modem) if the modem is operated in grids with strong harmonic distortion or high-frequency line distortions such as those on industrial sites or near irregular loads (unshielded motors, switched-mode power supply, power converters etc.). Furthermore the simultaneous operation of other powerline carrier devices may lead to short-term disturbance or interruption of data transmission via Powerline. Alternatively we offer communication via a separate data cable (RS232 or RS485) as an option.

We do not guarantee that the software is completely free of faults. In case of any defect an instruction how to avoid the effects of the fault is also considered as sufficient rectification of faults. Solely the customer is responsible for the correct selection, proper use, supervision and consequences of the use of software.

We reserve the right to make alterations that will improve the functioning of the device.

More extensive or other claims for direct and indirect damages, especially claims for damages including those from positive contract violation, are excluded unless otherwise required by law.
